Vision statement for Education for Sustainability

At Hesket Primary School we aim to educate our students to be ecologically aware and to develop sustainable practises to be used throughout their lives inside and outside of school. With understanding, appreciation and hard work, we believe that we can all be positive change agents now and in the future.

Staff will use the Vision statement as a part of their planning for their teaching and learning program.

The principal and school council will use the vision statement in determining policy and purchasing and planning for the future of the school in both curriculum and facilities developments.

Hesket Primary School's Sustainability achievements will be presented as part of the Annual Report in each calendar year.
